What's Hidden In Your Community?

Chances are, plenty! You probably belong to various types of communities, and know *some* of the other members and their interests. But often there is no easy way to find out all of the interests—passions, hobbies, beliefs, ideas, professions, skills, aspirations—that other members might want to make known to you, nor for you to express your own interests to all of them.

CommuniShare — Free Demo — Try It Now!

CommuniShare makes it easy...

CommuniShare is an easy-to-use web-based software program that helps communities of all kinds to communicate and share their own interests and resources. Community members can participate if, and as much, as they like, revealing whatever they choose about themselves, in their own words, and *only* to other members of their community. Members only need an e-mail address and access to a Web browser to participate. Click here to see a demonstration. Click here to find out about starting your own.

...for any type of community to benefit...

Every community is composed of people who are connected to one another. And these mutual connections help define the community. CommuniShare helps increase the effectiveness of the connections among the members of a community. And it can benefit virtually any type of community or community setting, including:

- Neighborhoods and Towns
- Public Libraries
- Colleges and Universities
- Corporations
- Dues-Paying Membership Organizations
- Communities of Faith
- Business and Professional Organizations
- Schools
- Residential Communities
- Specialized Retail Environments
- Other Types of Communities

...using community self-indexing.

When community members have an easy, private way to voluntarily reveal their interests and resources to one another, something fascinating happens: people discover hidden riches within their community. And that leads to connections that might not otherwise happen. As more numerous and diverse connections occur, the community is strengthened and grows organically. And community members can become empowered and more actively engaged with their community. Learn more about community self-indexing...
